

Vandalia Wildlife Management Area

2004 Small Mammal Trapping and Species Inventory Report

Montana Fish, Wildlife, and Parks (MFWP)

Steve Carson, Adam Messer, Andrew Jakes, Ryan Rauscher

August 3-10, 2004

Vandalia Wildlife Management Area (WMA) is a 310-acre parcel near Glasgow in MFWP Region 7. Portions of the WMA border the Milk River, and the riparian habitat associated with the river provides important cover and forage for a variety of wildlife. The WMA is a productive area for white-tailed deer, pheasants, and waterfowl, as well as non-game wildlife. Staff biologists have also constructed artificial nesting structures for geese and ducks (i.e. platforms, culverts, nest boxes) on the abandoned river oxbow. These initiatives are part of mitigation required of the Glasgow Irrigation District for

Findings: 15 Captures of 6 Species

- Small mammal trapping lines (Table 3)
 - 13 captures of 4 species
- Large Fox Cage
 - 0 captures
- Funnel Trap
 - 2 captures of 2 species

Table 1. Trapline/Trapsite Location and Habitat Type

(Trapped with other areas, thus traplines do not originate at 1)

Location #	Name	Habitat Type
11	line 11	Sagebrush Grassland
12	line 12	Riparian Grassland
13	line 13	Sagebrush Grassland
14	line 14	Riparian Grassland
Funnel	funnel 1	Riparian

Table 2. Captures Summary

Species Captured	Trapline					Total
	11	12	13	14	Funnel	
Northern Leopard Frog						
Frog					1	1
Deer Mouse	4	2	2	2		10
Meadow Vole		1				1
Long-Tailed Vole		1				1
House Mouse	1					1
Plains Garter Snake					1	1
Total Captures	5	4	2	2	2	15

Trapping Locations

General Landcover (Symbol color)

● Agriculture

● Barren / Badlands

● Broadleaf Forest

● Conifer Forest

● Grassland

● Shrub Grassland

* Not all landcover types were sampled at all sites.

Captures/100 trapnights (Symbol size)

* only calculated for trap lines

● 0 - 5

● >5 - 15

● >15
